"Pleased with Trackacow system and quick installation by James. Main thing is that it talks to our Kingswood Management System, so we don't have to double enter any data. Trackacow has picked up several cows which were bulling in early hours, which we definitely would not have seen."

**Philip Tinsley Summerhilltop Holsteins, Dromore, Co.Down 300 Cows**

"Recently started milking - so needed something that would tell me when to inseminate my cows. Trackacow hits the mark, simple installation, wide coverage and an easy to use programme that tells me exactly what is going on. Highly recommended!"

**Brian Trimble, Moss Road, Drumbo, Lisburn 60 Cows**
