Assessing Inbreeding

A degree of inbreeding always occurs when animals related to one another are mated as a result of a concentration of the same genes. See table to the right for Inbreeding Levels.

Rule of Thumb

Commercial producers should avoid matings leading to an inbreeding level of greater than 6.25%

Mating

Inbreeding %

Sire/Daughter	25%
Full brother/Full sister	25%
Half brother/Half sister	12.5%
Grandsire/Granddaughter	12.5%
Grandson/Granddam	12.5%
Uncle/Niece	6.25%
Son/Granddaughter	6.25%
Daughter/Grandson	6.25%
Full cousins	6.25%
Grandson/Granddaughter	3.13%
Half cousins	3.13%
