

JOB DESCRIPTION

ARTIFICIAL INSEMINATION TECHNICIAN

1. To call on farms, as directed, to artificially inseminate cows and heifers for herd owners.
2. To ensure that the operation is carried out in an effective and safe manner within the agreed daily timescale.
3. Carry out the proper cleansing and disinfecting procedures following each insemination.
4. Following each insemination, record details on the hand-held computer provided, and leave an invoice with the customer.
5. At the end of each day's work, transmit information on computer to central Computer at Head Office.
6. To collect, as directed, all debt, and to receipt and bank all monies received promptly.
7. To handle with care all Company property as issued, especially the semen flask and stock of semen contained, and the handheld computer and hardware.
8. To be responsible for the actual stock of semen in the flask.
9. To ensure that an adequate supply of semen is available in field flask to give the customer as wide a choice as possible.
10. To call, when requested, with D.I.Y./Service customers, in order to sell the Company's range of available semen.
11. To collect, bank and account for all monies received from those sales.
12. To feed back information to the Centre Managers on how the bulls offered by the Company are performing within the herds of their customers.
13. To be responsible on a day to day basis to their Centre Manager and through the Company Veterinarian for the health conditions of their daily work.
